

2022 | CENSUS OF AGRICULTURE

Northern Mariana Islands (2023) Commonwealth and Island Data Volume 1 • Geographic Area Series • Part 56

AC-22-A-56

Issued February 2025

United States Department of Agriculture
National Agricultural Statistics Service
Joe Parsons, Administrator

Acknowledgments

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) conducted the 2023 Census of Agriculture for the Commonwealth of the Northern Marian Islands (CNMI), analyzed the data, and prepared this and other reports. The census provides a comprehensive picture of the CNMI's agriculture in 2023, and NASS recognizes and appreciates that many individuals and organizations contributed to the effort.

Most importantly, the success of the agriculture census depends directly on the cooperation of farmers across the CNMI. Recognizing that participating in the census is their responsibility and gives them a voice in their future, agricultural operators took the time to provide the information requested. We are grateful to every operator who participated in the 2023 CNMI Census of Agriculture.

NASS acknowledges and appreciates the advice and support from the CNMI Department of Commerce, the Northern Marianas College and its Cooperative Research and Extension Education; USDA agencies, farm organizations, stakeholder groups, and media outlets. They provided valuable advice during the planning, data collection, and promotional phases of the census, as well as critical assistance to local farmers completing census forms. Our thanks to the enumerators who collected data locally through NASS' cooperative agreements.

Numerous farm organizations and media outlets were also instrumental in building awareness of the census and encouraging farmers to participate.

Finally, NASS acknowledges and appreciates the support services of the U.S. Department of Commerce National Processing Center in Jeffersonville, Indiana.

To learn more about the Census of Agriculture, visit www.nass.usda.gov/AgCensus, where you can access new and historic data in a variety of formats, including the Quick Stats database. To learn about other NASS reports and activities, visit www.nass.usda.gov. For additional information, contact NASS through email (nass@usda.gov) or by phone (800-727-9540).

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotope, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

A. Census of Agriculture Methodology	A-1
B. General Explanation and Census of Agriculture Report Form	B-1

Index	Index-1
-------------	---------

Introduction

HISTORY

For more than 150 years, the U.S. Department of Commerce, Bureau of the Census, conducted the census of agriculture. However, the 1997 Appropriations Act transferred the responsibility from the Bureau of the Census to the U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS).

The census of agriculture is taken to obtain agricultural statistics for each county, State (including territories and protectorates), and the Nation. The first U.S. census of agriculture data were collected in 1840 as a part of the sixth decennial census. From 1840 to 1920, an agricultural census was taken as a part of each decennial census. Since 1920, a separate national agricultural census has been taken every 5 years.

The 2023 census is the 8th census of agriculture of the Commonwealth of the Northern Mariana Islands. The first agriculture census was taken in 1970 in conjunction with the decennial census, a practice that continued in 1980 and 1990. The 1997 Census was the first agriculture census taken in the CNMI that was not done as part of the population census.

USES OF CENSUS DATA

The census of agriculture is the leading source of statistics about the CNMI's agricultural production and the only source of consistent, comparable data at the island level. Census statistics are used to measure agricultural production and to identify trends in an ever-changing agricultural sector. Many local programs use census data as a benchmark for designing and evaluating surveys. Private industry uses census statistics to provide a more effective production and distribution system for the agricultural community. One of the most important uses of the census data is to justify claims of farmers who may suffer damages and losses due to natural disasters, such as typhoons.

LEGAL AUTHORITY

The census of agriculture is required by law under the "Census of Agriculture Act of 1997," Public Law 105-113 (Title 7, United States Code, Section 2204g). The law

directs the Secretary of Agriculture to conduct a census of agriculture every fifth year. The census of agriculture includes each State, Puerto Rico, Guam, the U.S. Virgin Islands, the Commonwealth of Northern Mariana Islands, and American Samoa.

The data for the 2023 CNMI Census of Agriculture were collected in accordance with a Cooperative Agreement approved by the Director of the Census and Survey Division of NASS and by the CNMI Secretary of Commerce.

FARM DEFINITION

The statistics collected in the census relate to places with agricultural operations qualifying as farms according to the census definition. In the CNMI, this included all places from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the 12-month period between January 1 and December 31, 2023. The farm definition is the same that was used for the 2018 CNMI Census of Agriculture, and is the same definition used for the rest of the U.S.

DATA COMPARABILITY

In general, the data from the 2023 census are comparable with those of previous censuses. All dollar values presented in this report are in current dollars, i.e., 2023 data are expressed in 2023 dollars and 2018 data in 2018 dollars. The dollar values have not been adjusted for changes in price levels between census years. For other data changes between censuses, refer to the section on Data Changes in Appendix B.

REFERENCE PERIODS

Inventories of livestock and poultry are the number on hand on December 31, 2023. Machinery and equipment are the number on hand on the day of enumeration. Crop production, crop and livestock sales, and expense data are for the 12-month period between January 1 and December 31, 2023.

TABLES AND APPENDICES

Tables 1 through 11, 13 and 14 show detailed island data accompanied by historic data from the previous census.

Table 12 is a new table, Nursery Crops and Hemp, displaying data for 2023. Tables 15 through 29 show selected data items presented by municipalities. Tables 30 through 33 provide 2023 area data cross-tabulated by tenure of producer, age of producer, size of farm, and market value of agricultural products sold.

Appendix A. Provides information about data collection and data processing activities and discusses the statistical methodology used in conducting and evaluating the census.

Appendix B. Includes definitions of specific terms and phrases used in this publication, including items in the publication tables that carry the note "see text." It also provides a facsimile of the report form used to collect data.

RESPONDENT CONFIDENTIALITY

In keeping with the provisions of Title 7, United States Code, no data are published that would disclose the operations of an individual farm. However, the number of farms in a given size category or other classification is not considered a release of confidential information and is provided, even though other information may be withheld.

CUSTOM TABULATIONS

Custom-designed tabulations may be developed when data are not developed elsewhere. These tabulations are

developed to individual user specifications on a cost reimbursable basis and shared with the public. Quick Stats, NASS's online database that allows data users to build customized queries, should be investigated before requesting a special tabulation.

All special tabulations are subject to a thorough disclosure review prior to release to prevent the disclosure of any individual respondent data. Instructions to request a special tabulation can be found on the NASS website, including information about timing, fees, and the submission form. Questions can be directed to SM.NASS.Data.Lab@usda.gov.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used throughout the tables:

- Represents zero.
- (D) Withheld to avoid disclosing data for individual farms.
- (H) Coefficient of variation is greater than or equal to 99.5 percent or the standard error is greater than or equal to 99.95 percent of the mean.
- (L) Coefficient of variation is less than 0.05 percent or the standard error is less than 0.05 percent of the mean.
- (NA) Not available.
- (X) Not applicable.
- (Z) Less than half of the unit shown.
- cwt Hundredweight.
- sq. ft. Square feet.

Northern Mariana Islands Map

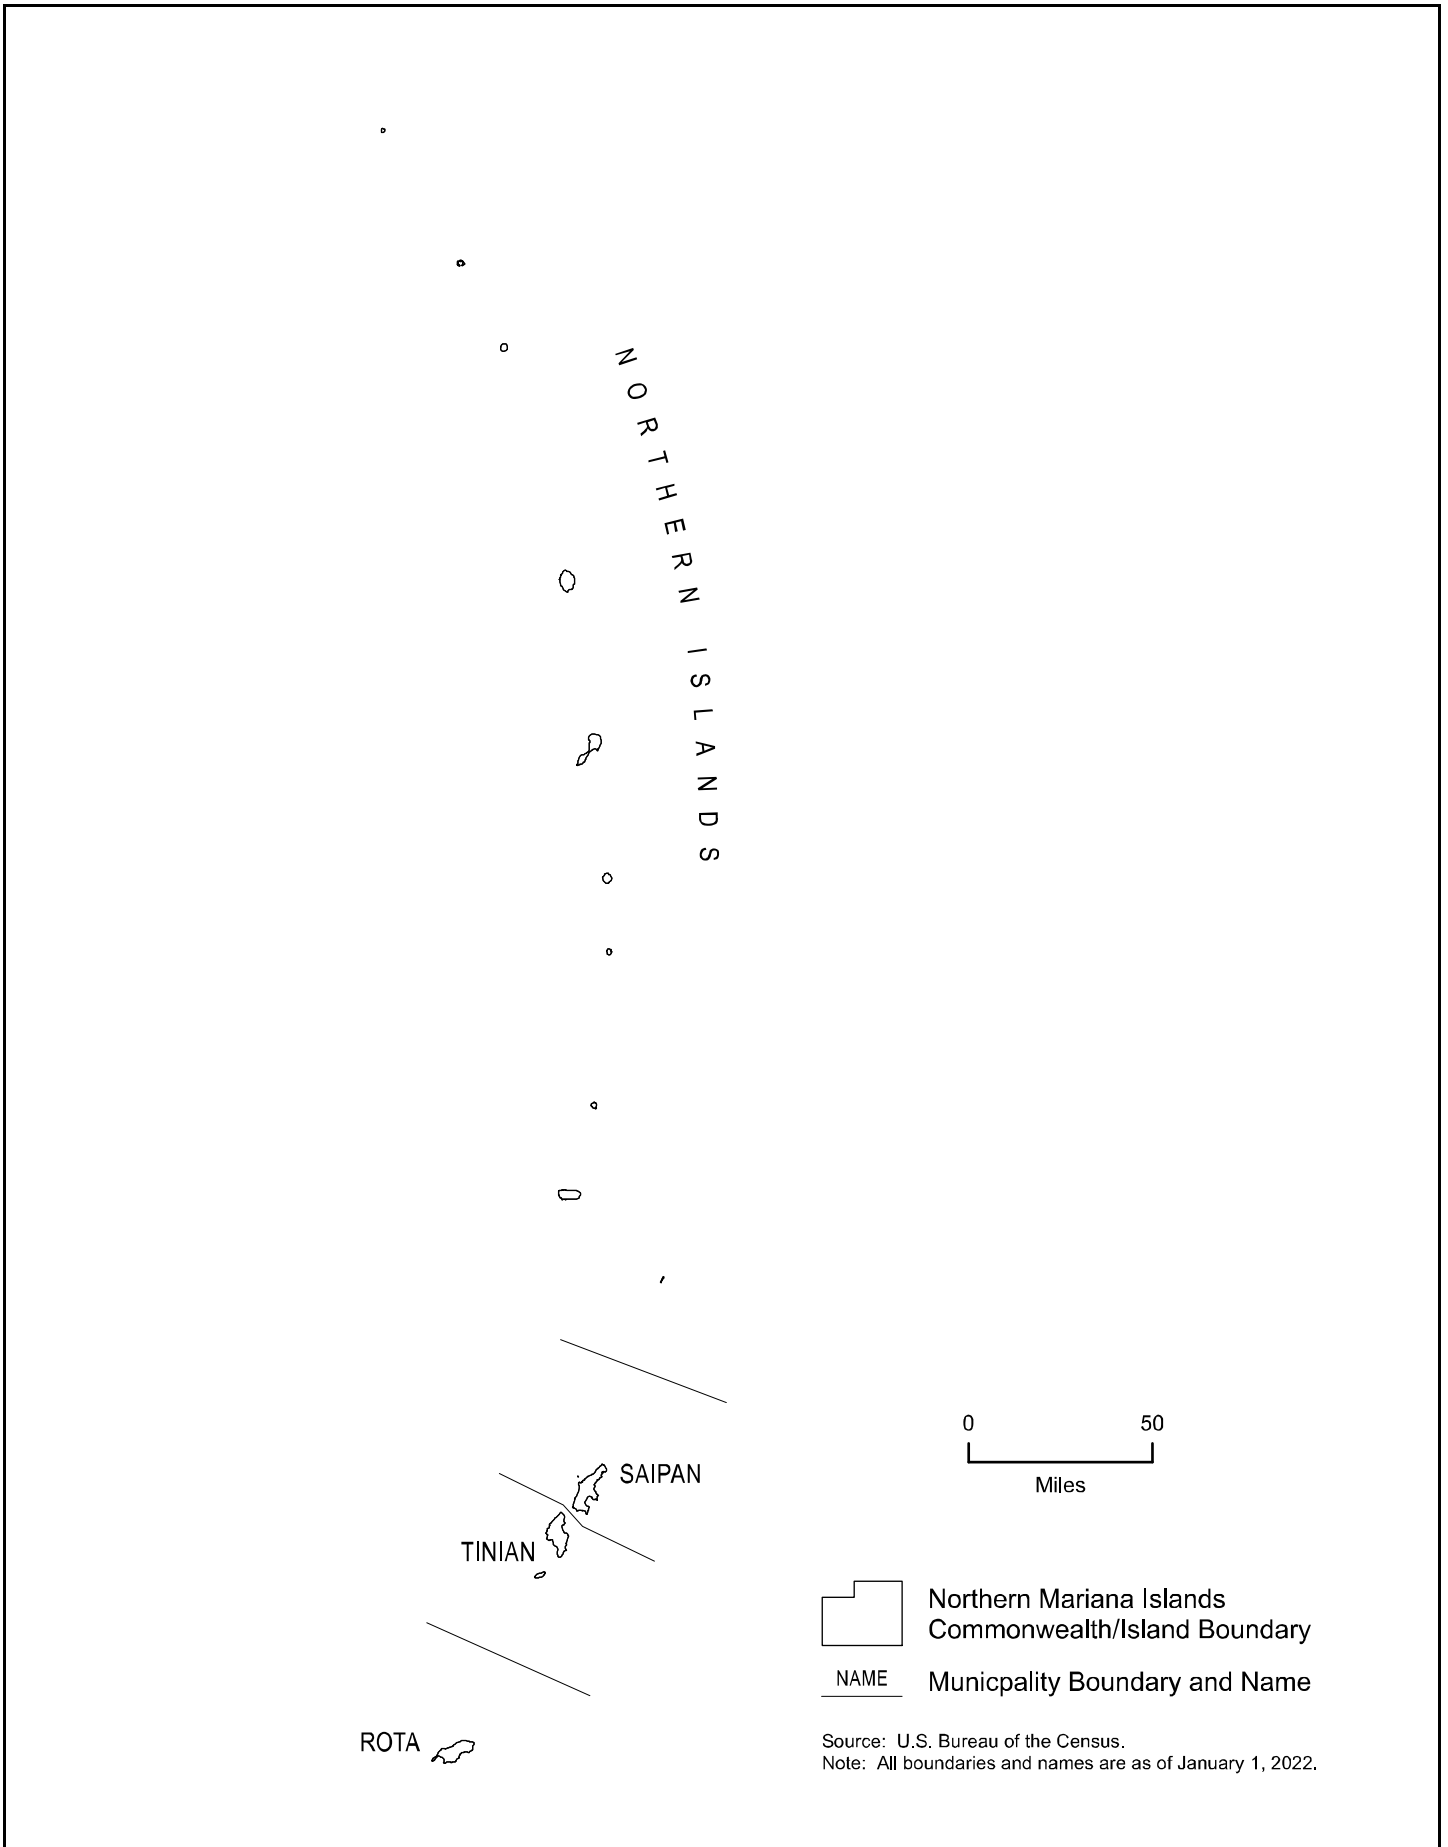

Table 1. Farms, Land in Farms, and Land Use: 2023 and 2018

[Totals may not add due to rounding. For enumeration periods, see appendix A. For meaning of abbreviations and symbols, see introductory text.]

All farms	2023	2018	All farms	2023	2018

¹ Producers may report more than one race.

² Asian and Native Hawaiian or Other Pacific Islander will represent respondents that checked any one of the subcategories listed below.

³ Multiple producers per farm may be reported.

⁴ Includes dry and green corn.

Appendix A.

Census of Agriculture Methodology

INTRODUCTION

The purpose of the Census of Agriculture is to enumerate all members of a population with a defined characteristic. For the Census of Agriculture of the Commonwealth of the Northern Mariana Islands (CNMI), that goal is to account for “any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.”

As in the previous censuses of the CNMI, a direct enumeration procedure was used in the 2023 Census of Agriculture. Enumeration was based on a list of farm producers compiled by NASS with assistance from the CNMI Department of Commerce, Central Statistics Division.

THE CENSUS POPULATION

For the 2023 CNMI Census of Agriculture, the National Agricultural Statistics Service (NASS) compiled a complete as possible list of agricultural places that meet the farm definition. This list included agricultural places that meet the farm definition on the 2018 CNMI Census of Agriculture and potential agricultural places provided by the CNMI Department of Commerce and a variety of other agriculture-related lists. The list of potential agricultural places was matched to the 2018 CNMI Census of Agriculture records using record linkage programs to remove duplication between lists. The enumerators contacted all persons or operations on the list and completed a census report form for all farm operations that met the farm definition. If the person on the list was not operating a farm, the enumerator recorded whether the land had been sold or rented to someone else and was still being used for agriculture. If the land was sold or rented out, the enumerator obtained the name of the new producer and contacted that person, to ensure that he/she was included in the census.

DATA COLLECTION OUTREACH AND PROMOTIONAL EFFORTS

The Public Affairs Office (PAO) developed a communication plan largely based on promotional materials that were shared with local outreach partners, including but not limited to the CNMI Department of

Commerce, the Northern Marianas College and its Cooperative Research Extension, and local USDA agencies. The goal with these promotional materials included:

- Encouraging participation in the Census of Agriculture
- Communicating how the census will provide much needed data that are used by federal and local decision makers
- Explaining that response to the Census of Agriculture is required and that reported information is protected by federal law
- Increasing general awareness and perceived value of NASS, its products, and services

Partnership and Local-Level Outreach

NASS officials met with leaders from agricultural organizations, the CNMI Department of Commerce, the Northern Marianas College and its Cooperative Research Extension and other USDA agencies to successfully secure their support in promoting the census among their constituencies. Stakeholders partnered with NASS to promote the 2023 CNMI Census of Agriculture through publications (e.g. newsletters), special mailings, speeches, social media, websites, and other communications. Through grassroots-level outreach and efforts, NASS partnered with a number of community-based organizations to reach all farmers. Among the highlights of these partnership efforts was the participation of local government officials on radio public service announcements promoting the importance of the 2023 CNMI Census of Agriculture.

Public Relations

In the public relations arena, NASS worked with internal and external stakeholders to equip them with communications tools and resources to deliver the census communications message to their audiences. The materials included, but were not limited to: a press release/stakeholder notice, a public service announcement, flyers and posters, and a Frequently Asked Questions (FAQs) document; which were drafted for local media and other stakeholder distribution. These materials were

available both electronically and in hard copy. Other outreach tools included items such as pens and notepads.

DATA COLLECTION

Method of Enumeration

Personal enumeration was used in the 2023 CNMI Census of Agriculture, and in the 2018 CNMI Census of Agriculture, enumeration was based on a list of farm producers compiled by NASS with assistance from the CNMI Department of Commerce, Central Statistics Division. The enumerators contacted all persons or operations on the list and completed a census report form for all farm operations that met the farm definition. If the person on the list was not operating a farm, the enumerator recorded whether the land had been sold or rented to someone else and was still being used for agriculture. If the land was sold or rented out, the enumerator obtained the name of the new producer and contacted that person, to ensure that he/she was included in the census.

Report Form

Prior to each agriculture census, the content of all census report forms is reviewed to eliminate inquiries no longer needed, to identify new items necessary to meet user needs, and to better describe the agricultural situation in the CNMI. Data requests are solicited from farm organizations, land-grant colleges and universities, State and Federal agencies, State Department of Agriculture, agribusinesses, and other users. Each respondent is asked to identify and justify its specific data needs.

A single version of the report form for the 2023 CNMI Census of Agriculture was prepared by NASS, in cooperation with the CNMI Department of Commerce, the Northern Marianas College and its Cooperative Research Extension; and various USDA agencies. Based on their comments, the content of the 2023 census report has been updated to reflect the CNMI's agriculture. Changes on the report form are summarized in Appendix B.

Training Program

The project manager, and enumerators employed for the census in the CNMI received special training in accordance with instructions prepared by NASS. The training included an overview of the census of agriculture program, and a detailed discussion of the enumerator's instructions manual and the census report form.

REPORT FORM PROCESSING

Data Capture

The Census Bureau's National Processing Center (NPC) in Jeffersonville, IN was contracted to print, label, and ship

the questionnaires to the CNMI. Completed questionnaires were then returned to NPC for data capture and scanning.

NASS staff on site at the NPC provided technical guidance and monitored NPC processing activities. All report forms returned to the NPC were immediately checked in, using bar codes printed on the mailing label. With the small survey universe, it was determined that a key from paper application would be most economical. All forms keyed were then scanned and loaded into the Feith file cabinet. The images were available for analytical review of the data as well as for archive purposes.

The keying staff evaluated the contents and captured pertinent responses. An independent quality control process occurs after initial keying where ten percent of the captured data is keyed a second time. If differences existed between the first keyed value and the second, an adjudicator handled resolution. The decision of the adjudicator was used to grade the performance of the keyers, who were required to maintain a certain accuracy level or receive additional training. Procedures, training, and staff remained the same from 2018 to 2023 for all four islands, Guam, the Commonwealth of the Northern Mariana Islands, American Samoa, and the U.S. Virgin Islands. The combined error rate for all four islands was 0.54%. The images and the captured data were transferred to NASS's centralized network and became available to NASS analysts on a flow basis. The images were available for use in all stages of review.

Editing Data

Captured data were processed through a computer formatting program. The program verified that record identifiers were valid and checked the basic integrity of the data fields. Rejected records were referred to analysts for correction. Accepted records were sent to a computer batch edit process. Each execution of the computer batch edit flowed as the data were received from the National Processing Center (NPC).

All census records were passed through a complex computer edit. The edit determined whether a reporting operation met the minimum criteria to be counted as a qualifying farm (in-scope). The edit examined each in-scope record for reasonableness and completeness and determined whether to accept the recorded value for each data item or take corrective action. Actions included removing erroneously reported values, replacing an unreasonable value with one consistent with other reported data. Strategies for determining replacement values are discussed in the next section.

Imputing Data

The edit systematically checked reported data section-by-section with the overall objective of achieving an internally consistent and complete report. NASS subject-matter experts defined the criteria for acceptable data. Problems that could not be resolved within the edit were referred to an analyst for intervention. Analysts used additional information sources, examined the scanned image, and determined an appropriate action.

Data Analysis

Once keyed, the data from each report form were available to NASS analysts in Washington, DC, via electronic media, for computer editing and analysis. Data from each report were subjected to a detailed item-by-item computer edit. The edit performed comprehensive checks for consistency and reasonableness, corrected erroneous or inconsistent data; supplied missing data based on similar farms, and assigned farm classification codes necessary for tabulating the data.

Prior to publication, tabulated totals were reviewed by statisticians to identify inconsistencies and potential coverage problems. Comparisons were made with previous census data, as well as other available data. Tallies of all selected data items for various sets of criteria which included, but were not limited to, geographic levels, farm types, and sales levels were reviewed. When necessary, data inconsistencies were resolved.

DISCLOSURE REVIEW

After tabulation and review of the aggregates, a comprehensive disclosure review was conducted. NASS is obligated to withhold, under Title 7, U.S. Code, any total that would reveal an individual's information or allow it to be closely estimated by the public. Cell suppression will be used to protect the cells that are determined to be sensitive to a disclosure of information. Farm counts are not considered sensitive and are not subject to disclosure. Cell suppression will be used to protect the cells that are determined to be sensitive to a disclosure of information.

Based on agency standards, data cells were determined to be sensitive to a disclosure of information if they failed either of two rules. The threshold rule failed if the data cell contained less than three operations. For example, if only one farmer produced hogs on the island, NASS could not publish the island total for hog inventory without disclosing the individuals' information. The dominance rule failed if the distribution of the data within the cell allowed a data user to estimate any respondent's data too closely. A data disclosure risk is determined to be present if a particular data cell being considered for publication violates either one of two criteria. First, the threshold rule

is violated if the estimated number of farms in a data cell is less than three. For example, if there are many farmers producing hogs on the island and some of them were large enough to dominate the cell total, NASS could not publish the island total for hog inventory without risking disclosing an individual respondent's data. In both of these situations, the data were suppressed and a "(D)" was placed in the cell in the census publication table. These data cells are referred to as primary suppressions.

Since most items were summed to marginal totals, primary suppressions within these summation relationships were protected by ensuring that there were additional suppressions within the linear relationship that provided adequate protection for the primary. A detailed computer routine selected additional data cells for suppression to ensure all primary suppressions are properly protected. These data cells are referred to as complementary suppressions. These cells are not themselves sensitive to a disclosure of information but were suppressed to protect other primary suppressions. A "(D)" was also placed in the cell of the census publication table to indicate a complementary suppression. A data user cannot determine whether a cell with a (D) represents a primary or complementary suppression.

NASS analysts reviewed all complementary suppressions to ensure no cells had been withheld that were vital to the data users. In instances where complimentary suppressions were deemed critically important to the Island, analysts requested an override, and a different complement cell were chosen.

MEASURED ERRORS IN THE CENSUS PROCESS

Uncertainty is introduced into the data in compiling the list of farm producers, in NASS' data collection procedures, in data editing and processing, and in compiling the final data. Additionally, NASS uses statistical procedures to both measure errors in the various processes and in making adjustments for those errors in the final data.

Variability in Census Estimates due to Statistical Adjustment

In conducting the 2023 CNMI Census of Agriculture, efforts were initiated to measure error associated with the adjustments for farm operations that were on the list of farm producers but did not respond to the census, report form. This error measurement was developed from the standard error of the estimates at the island level, where appropriate, and were expressed as coefficients of variation (CVs) at the island level. Coefficients of variation are displayed in the Quick Stats database.

Coefficient of variation is a measure of the relative amount

of error associated with a sample estimate. Specifically, it is the standard error of a point estimate divided by that estimate, generally multiplied times 100 so that it can be reported as a percentage. This relative measure allows the reliability of a range of estimates to be compared. For example, the standard error is often larger for large population estimates than for small population estimates, but the large population estimates may have a smaller CV, indicating a more reliable estimate. Every estimate for the 2023 CNMI Census of Agriculture has a corresponding CV published with it. NASS has identified the following index to use when evaluating coefficient of variation for the 2023 CNMI Census of Agriculture.

- **Low Reliability Estimate.** Coefficient of Variation (CV) 30 percent or higher. Caution should be used when using this estimate in any form. Please consult NASS for more information or guidance.
- **Medium Reliability Estimate.** Coefficient of Variation (CV) between 15 percent and 29.9 percent.
- **High Reliability Estimate.** Coefficient of Variation (CV) less than 15 percent.

NONMEASURED ERRORS IN THE CENSUS PROCESS

As noted in the previous section, sampling errors can be introduced from the nonresponse adjustment procedure. This error is measurable. However, nonsampling errors are imbedded in the census process that cannot be directly measured as part of the design of the census but must be contained to ensure an accurate count. Extensive efforts were made to compile a complete and accurate list of farmers for the census, to design an understandable report form with clear instructions, to train enumerators on how

to ask the questions and record the answers on the report form, and to minimize processing errors through the use of quality control measures. The weight adjustment and tabulation processes recognize the presence of nonsampling errors; however, it is assumed that these errors are small and that, in total, the net effect is zero. In other words, the positive errors cancel the negative errors.

Respondent and Enumerator Error

Incorrect or incomplete responses to the census report form or to the questions posed by an enumerator can introduce error into the census data. Steps were taken in the design and execution of the census of agriculture to reduce reporting errors. Poor instructions and ambiguous definitions lead to misreporting. Respondents may not remember accurately, may estimate responses, or enumerators may record an item in the wrong cell. To reduce reporting and recording errors, detailed instructions for completing the report form were provided to each enumerator, and questions were phrased as clearly as possible. In addition, each respondent's answers were checked for completeness and consistency by the complex edit and imputation system.

Item Nonresponse

All item nonresponse actions provide another opportunity to introduce measurement errors. Regardless of whether it was previously reported data, administrative data, the nearest neighbor algorithm, the fully conditional specification method, or manually imputed by an analyst, some risk exists that the imputed value does not equal the actual value.

Appendix B.

General Explanation and Census of Agriculture Report Form

DEVELOPMENT OF THE CENSUS REPORT FORM

Prior to each agriculture census, the content of all census report forms is reviewed to eliminate inquiries no longer needed and to identify new items necessary to meet user needs, so that published data better describes the agricultural situation in the CNMI. Data requests are solicited from farm organizations, land-grant colleges and universities, State and Federal agencies, State departments of agriculture, agribusinesses, and other users. Each user is asked to identify and justify its specific data needs.

The report form for the 2023 Census of Agriculture for the CNMI was prepared by NASS, in cooperation with the CNMI Department of Commerce, Central Statistics Division. A summary of changes on the report form reflecting the CNMI's agriculture are summarized below. A sample copy of the report form is included in this appendix.

DATA CHANGES

Following are descriptions of the report form changes:

- Section 3, “Vegetables and Melons” –
 - Beans were expanded to include “Winged.”
 - Cabbage was limited to include only “Chinese.”
 - Corn was moved from the Field and Forage Crop section and now captured as “Sweet Corn” in this section.
 - Radishes were expanded to include “Red and Chinese.”
 - Herbs were added as response option.
 - Represents crops harvested for sale in 2023.
- Section 4, “Fruit, Nuts, and Nursery Crops” –
 - Nursery crops were removed from this section and placed along with hemp under Section 5.
 - Dragon fruit and Mountain apples were added to the list of printed crops in this section.
 - Represents crops grown or harvested for sale in 2023.
- Section 5, “Nursery Crops and Hemp” –
 - An extended section was created to specify for Nursery crops and Hemp. Bedding/Garden plants, Cut flowers/Cut florist greens, Foliage plants (indoor use), Potted flowering plants, Other floriculture and bedding, Nursery stock, and Hemp were added as response options.
 - Value of sales is reported for each commodity.
 - In 2018 and prior years, hemp was included in “Other crops,” while the other nursery crops were summed up under one line of data as “Nursery crops.”
 - Represents crops grown or harvested for sale in 2023, including acres in the open and area under protection.
- Section 7, “Livestock” –
 - Value of sales is listed for each livestock animal type.
- Section 8, “Poultry” –
 - Value of sales is listed for each poultry bird type.
- Section 10, “Production Expenses” – Additional expense items were added:
 - Repairs, supplies, and maintenance costs.
- Section 12, “Practices” –
 - Data for Employing Freely Associated States citizens is no longer collected on the census form.
 - Additional items were added for practices regarding land use such as: fallow land, crop rotation, pasture rotation, and plant grass for land improvement.
 - Use of precision agriculture was added to practices. Precision agriculture is the use of practices that utilize technology to improve agricultural productivity or efficiency.
 - Methods used to access the internet were updated. Broadband methods were combined into one category, and broadband over powerlines was deleted as a category.
 - Value of processed or value-added agricultural products sold were added.

- Section 13, “Producer Characteristics” –
 - “Operator” term was replaced by “Producer” on the entire form to be consistent with NASS standard census terminology and to improve the collection of characteristics of the farm producer.
 - A new question was added to capture Latino, Hispanic, or Spanish origin. Race of producer was updated to White, Black or African American, American Indian or Alaska Native, Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, Other Asian, Native Hawaiian, Carolinian, Chamorro, Samoan, and Other Pacific Islander.
 - Data for U.S. citizenship is no longer collected on the census form.
 - Total number of male and female producers involved in decision making for the farming operation was added.

DEFINITIONS AND EXPLANATIONS

The following definitions and explanations provide a detailed description of specific terms and phrases used in this publication. Items in the publication tables which carry the note “see text” also are explained. Report form section number references refer to the CNMI Census of Agriculture report form, 23-A1(CNMI). Many of the definitions and explanations are the same as those used in earlier censuses.

Agricultural practices. Respondents were asked did they use any of the following practices: have fallow land, rotate crops, build paddocks for pasture rotation, plant any grasses for land improvement, and use of precision agriculture practices.

Broadband. This item is the number of farms that reported using DSL, cable, or fiber optic connections to the internet.

Cellular data plan. Mobile internet service for a cell phone or other device. This includes counts of farm operations that reported accessing the internet from a mobile device, such as a cell phone or tablet. In 2018, this item was labeled mobile broadband plan for a computer or a cell phone. This is a wording change only; data are comparable.

Crops. The report form contained individual inquiries for crops commonly grown and space to write in those less frequently produced. The information requested for 2023 included acres of crops harvested and pounds harvested for sale.

The units of measure for reporting quantities of some crops have varied from one census to another. The aim has been to permit reporting in the units of measure currently in use. The quantities harvested for each crop are expressed in the

units of measure given on the 2023 report form.

Fruits and nuts - The total number of acres planted in bearing and nonbearing fruit and nut trees and plants was collected. For individual fruit or nut crops, data on the number of bearing and nonbearing trees and plants, and the quantity harvested for sale, were reported.

Nursery crops and hemp - The total land area harvested, both square feet under cover and acres in the open, were collected, along with the value of sales.

Root crops - The land area from which individual root crops were harvested for sale was obtained in acres and tenths of acres. When two or more crops were harvested from the same land, the area was to be reported for each separate crop or planting. Total quantities of each crop harvested for sale were also reported.

Vegetables and melons - Land area for individual crops and the quantity harvested for sale for each crop were collected.

Equipment. The following types of equipment on the place at time of enumeration regardless of ownership, were reported if they were operable:

Automobiles - This includes all vehicles used primarily as passenger cars.

Motortrucks - This includes pickup trucks and truck-trailer combinations.

Tillers of all kinds - This includes all types of tillers used to prepare soil for planting.

Tractors of all kinds - This includes all wheel and track-laying (crawler) tractors and garden tractors.

Expenses. The 2023 report form contained questions on eleven types of farm expenses incurred between January 1 and December 31, 2023, whether made by the farm producer, his/her landlord, or both. A farm producer who rented part of his/her land to others reported only the expenses on the land he/she operated.

Feed purchased for livestock, poultry, and fish - Expenses for feed for livestock, poultry, and fish include total cash payments made for pasture used, salt concentrates, mineral supplements, grain, hay, mill feeds, and any other items purchased for feeding livestock, poultry, and fish on the place. Expenses made for the grinding and mixing of feed and the estimated cost of items furnished to the producer by a landlord or others are also included. Payments made by a tenant to a landlord for feed grown on the tenant's farm

are excluded.

Gasoline, fuels, and oil purchased for the farm business - This item includes expenses for gasoline, fuels, and oil purchased for the farm.

Machine hire and customwork - Expenses for machine hire and customwork relate to tractor hire, plowing, and spraying. Any amount spent for the labor involved will be part of the expense. The costs of hauling, trucking, or exchange work without pay are omitted.

Purchases of fertilizers and manure - These expenses include the total amount spent for manure and commercial fertilizers of all kinds for use on the farm.

Purchases of insecticides, fungicides, and herbicides - This item relates to total cash expenses for all chemicals, sprays, dusts, etc., used to control weeds, pests, insects, or disease on crops.

Purchases of livestock, poultry, and fish - This item includes all cash expenses for livestock, poultry, and fish purchased for the place. The cost of livestock and poultry bought and resold within 30 days is not included.

Repairs, supplies, and maintenance costs for the farm business - Additional farm business expenses are being accounted under this category for operational business purposes.

Seed cost - These expenses include all seed purchased for planting, as well as seedlings.

Transportation cost (excluding fuel expenses) - This item includes transportation expenses, excluding the cost for gasoline, and fuels, related to the farm business.

Wages and salaries paid to employees or hired farm workers - Expenses for hired farm labor include total cash payments made to family members and others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the person in charge are also included.

Water expenses - This item includes water expenses for the farm.

Farm producer. The term "producer" designates a person who operates a farm, either by doing the work himself/herself or by directly supervising the work. The producer may be the owner, a member of the owner's household, a hired manager, or a tenant, renter, or sharecropper. If the producer rents land to others or has land worked on shares by others, he/she is considered the

producer only if the land is retained for his/her own operation. In the case of partnership, only one partner is counted as a producer. By definition, the number of producers is the same as the number of farms.

Farms by age of producer. Enumerators entered the producer's age, as of his/her last birthday, on the report form. The computer edit classified the producer's age into one of the following age groups:

Under 35 years	35 to 44 years
45 to 54 years	55 to 64 years
65 years and over	

Farms by size. All farms were classified by size on the basis of the total land area established in each farm. According to the census definition, a farm is essentially an operating unit, not an ownership tract. All land operated or managed by one person or partnership represents one farm. In the case of tenants, the land assigned to each tenant is considered a separate farm, even though the landlord may consider the entire landholding to be one unit rather than several separate units.

Farms by tenure of producer. In the 2023 census, all farms were classified by tenure of producer on the basis of data reported for land owned, rented from others, worked on shares for others, and managed for others. The same classification has been used since 1964. During processing operations, each report form was coded to indicate whether the producer was a full owner, part owner, or tenant.

Full owners - Operate only land they own

Part owners - Operate land they own and also land they rent from others

Tenants - Rent from others or work the land they operate on shares for others

Farms by value of agricultural products sold. All farms were classified on the basis of the total value of agricultural products sold. The total was obtained by adding the reported values of all products sold from the farm. The value of livestock, milk, poultry and eggs, fish, vegetables, fruits and nuts, all field crops, ornamental plants, and all other crops was obtained from the producer at the time of enumeration. The computer edit classified the value of agricultural products sold into one of the following groups:

Less than \$1,200	\$1,200 to \$2,499
\$2,500 to \$4,999	\$5,000 to \$7,499
\$7,500 to \$9,999	\$10,000 or more

Farms or producers reporting. Figures for "farms

reporting" or "producers reporting" represent the number of farms or producers reporting the specified item. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item.

Land in farms. The land in farms was determined from the answers to questions 1 through 4 in section 1 of the report form (see appendix B). The amounts of land reported as owned and reported as rented from others were added together, and the amount of land reported as rented to others was subtracted from that sum. The result represents "land in farms."

Land owned. This includes all land that the producer or his/her spouse held under title, purchased contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration.

Land rented from others. This includes not only land the producer rented or leased from others, but also land worked on shares for others or land occupied rent free.

Land rented to others. This includes all land that the producer rented to others and all land assigned to others on shares or rent free. For the most part, land rented to others represents agricultural land, but it also includes land rented for residential or other purposes. The tenant is considered to be the producer of land leased, rented, or worked on shares, even though his/her landlord may supervise the operations. The landlord is considered to be the producer of only that portion of the land not assigned to tenants.

Land use. Land in farms at the time of enumeration is categorized according to the way it was used between January 1 and December 31, 2023. The land is counted only once, even though it may have had more than one use during the year.

Cropland harvested - This refers to all land from which any crop was harvested. It also includes land in field crops that were grazed when mature or almost mature, and land in nonbearing fruit or nut trees and plants. Land from which two or more crops were harvested and which was also used for other purposes, either before or after the crops were harvested, was to be reported as cropland harvested without regard to the other uses.

Other cropland - This includes all cropland on the place that was used for pasture, and cropland on the place that was not used for crops or pasture. It includes land on which there was total crop failure due to hurricane, flood, drought, insects, fire, or other causes; cropland lying idle; and cropland planted with soil improvement grasses or other cover crops planted for improvement. It does not

include land so hilly, rocky, or wet that the cost of improving it for cultivation would be more than the producer could pay. It does not include land in roads, streams, or swamps.

Pasture or grazing land - This refers to all land used for pasture or grazing, except cropland. It includes all woodland where livestock pastured or grazed. It does not include cropland, even though cattle or other livestock may have been grazed on it.

Woodland - This includes all land that is covered in woods or forests. It does not include woodland pasture.

Other land - This refers to all land not included in the other land use classifications, such as house and other building lots, lanes, roads, ditches, and land area of ponds and wasteland.

Livestock and poultry. Inventory data for livestock and poultry relate to the number on hand at the time of enumeration. All livestock and poultry were to be enumerated on the place where they were at the time of enumeration regardless of who owned them. Livestock on unfenced land were to be reported as being on the place identified as the headquarters of the person who had control over them. A precise date aiming at the last day of the year was placed for reporting the total number of livestock animals and the total number of poultry birds kept on the farm.

Number of producers. This item is the total count of producers involved in decisions for the operation reported by the respondent. Multiple producers per farm may have been reported.

Producer characteristics. Data were obtained to classify the producers according to the following seven characteristics:

Age of producer - Producers were classified by age into five groups. The average age was obtained by dividing the sum of the ages of all producers reporting by the number reporting.

Main occupation - If the producer devoted 50 percent or more of his/her work time to agricultural activities, his/her main occupation was considered to be agriculture, otherwise his/her occupation was considered to be nonagricultural.

Hispanic, Latino, or Spanish origin. Producers of Hispanic, Latino, or Spanish origin are found in all racial groups listed in the census and were tabulated according to the race reported.

Race of producer - Respondents were asked to choose between White, Black or African American, American Indian or Alaska Native, Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, Other Asian, Native Hawaiian, Carolinian, Chamorro, Samoan, or Other Pacific Islander to describe their race or national origin.

Residence of producer - Producers were classified by residence according to whether or not they lived on the farms operated. Where all the land was rented from others or worked on shares for others, the dwelling was considered to be on the farm operated provided the dwelling he/she occupied was included in the rental agreement. In such cases, the dwelling was not necessarily on the land being operated. Similarly, a producer who did not live on the land being cultivated or grazed, but who had some agricultural operations (other than a home garden) at his/her dwelling, was considered to be living on the farm.

Sex of producer - Producers are classified as male or female.

Work off-farm - The extent to which producers rely on nonfarm sources for part of their income is indicated by the number of days worked off the farm during the year. Work off the farm was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions whether the work was done on the farm premises or elsewhere. Exchange work was not included.

Years on present farm - Producers were classified by years on present farm into four groups. These data were based on the question asking the year the producer began operation of the present farm or any part of it.

Rate paid for irrigation. Producers who used public systems for irrigation were asked if they paid an agricultural rate or residential rate.

Use of precision agriculture practices. The use of precision agricultural practices is defined as the use of practices that utilize technology to improve agricultural productivity or efficiency by connecting the practice to a digital environment for crop or livestock production.

Value of processed or value-added agricultural products sold. Data represent the value of products that originated from crop or livestock commodities produced on the operation. Through further manufacture or processing, these items are transformed into products worth more than the originally produced commodity.

Value of products sold. Data for value of products sold were obtained for each group of crops or main type of livestock sold from the farm. Data were obtained for sales of field and forage crops, vegetables, fruits and nuts, nursery crops, poultry and poultry products, cattle and calves, hogs and pigs, fish and other aquaculture products, other livestock and livestock products and chicken eggs.

16. Starfruits	0202 <input type="checkbox"/>	0203	0204	
17. Sweetsops	0205 <input type="checkbox"/>	0206	0207	
18. Tangerines	0208 <input type="checkbox"/>	0209	0210	
19. Other fruits and nuts - Specify <input checked="" type="checkbox"/>				
0979 <input type="text"/>	0211 <input type="checkbox"/>		0516	
0214 <input type="text"/>	0215 <input type="checkbox"/>		0217	

20. What was the value of sales of fruits and nuts sold from this place in 2023?..... 0332 None

Dollars	
\$.00

SECTION 5 NURSERY CROPS AND HEMP

Were any NURSERY CROPS or HEMP grown or harvested FOR SALE in 2023?

0816 1 Yes - Complete this section 3 No - Go to Section 6

	None	Square feet under cover	Acres in the open		Value of sales in 2023
			Whole acres	Tenths	
1. Bedding/Garden plants 0400	<input type="checkbox"/>		0401	/10	0402 \$.00
2. Cut flowers/Cut florist greens 0403	<input type="checkbox"/>		0404	/10	0405 \$.00
3. Foliage plants, indoor 0406	<input type="checkbox"/>		0407	/10	0408 \$.00
4. Potted flowering plants 0409	<input type="checkbox"/>		0410	/10	0411 \$.00
5. Other floriculture and bedding – Specify ↘					
0412 <input type="text"/>	0413 <input type="checkbox"/>		0414	/10	0415 \$.00
0416 <input type="text"/>	0417 <input type="checkbox"/>		0418	/10	0419 \$.00
6. Nursery stock 0420	<input type="checkbox"/>		0421	/10	0422 \$.00
7. Hemp 0817	<input type="checkbox"/>		0818	/10	0819 \$.00

SECTION 6 IRRIGATION

Was Any LAND in this place IRRIGATED at any time during 2023? Irrigated land is all land watered by any artificial or controlled means: sprinklers, furrows or ditches, spreader dikes, etc. Include supplemental, partial, and pre-plant irrigation.

0006 1 Yes - Complete this section 3 No - Go to Section 7

	None	Whole acres	Tenths
1. How many acres were irrigated from a PRIVATE SYSTEM (wells, rivers, brooks, etc.)? 0237	<input type="checkbox"/>		/10
2. How many acres were irrigated from a PUBLIC SYSTEM? 0238	<input type="checkbox"/>		/10
3. If water from a public system was used, which rate was charged for the water?			
0470 1 <input type="checkbox"/> Agricultural rate 2 <input type="checkbox"/> Residential rate			
4. Major source of water used for irrigation:			
0247 1 <input type="checkbox"/> Well or cistern 3 <input type="checkbox"/> Lake or private pond 5 <input type="checkbox"/> Public utility			
2 <input type="checkbox"/> River or stream 4 <input type="checkbox"/> Canal or irrigation district 6 <input type="checkbox"/> Other – Specify ↘			
0473 <input type="text"/>			

SECTION 7 LIVESTOCK

Do you or anyone else have any LIVESTOCK (excluding poultry and fish) on this place or were any sold from this place in 2023?

0007 1 Yes - Complete this section 3 No - Go to Section 8

		None	How many were on this place Dec 31, 2023?	How many were sold in 2023?	What was the value of sales in 2023?	
1.	Cattle and calves of all ages (Total of "a" and "b" below)	0240 <input type="checkbox"/>		0241	0242	\$.00
	a. Cows	0480 <input type="checkbox"/>		0481	1000	\$.00
	b. All other cattle and calves	0248 <input type="checkbox"/>		0249	0250	\$.00
2.	Hogs and pigs of all ages	0252 <input type="checkbox"/>		0253	0254	\$.00
3.	Goats and kids of all ages	0274 <input type="checkbox"/>		0275	0593	\$.00
4.	Horses, mules, and colts of all ages	0256 <input type="checkbox"/>		0257	0258	\$.00
5.	Other livestock - Specify ↴					
0626	<input type="text"/>	0268 <input type="checkbox"/>		0269	1010	\$.00
0627	<input type="text"/>	0628 <input type="checkbox"/>		0629	1012	\$.00

SECTION 8 POULTRY

Do you or anyone else have any POULTRY on this place or were any sold from this place in 2023?

0008 1 Yes - Complete this section 3 No - Go to Section 9

		None	How many were on this place Dec 31, 2023?	How many were sold in 2023?	What was the value of sales in 2023?	
1.	Chicken hens 4 months old and over (Total of "a" and "b" below)	0292 <input type="checkbox"/>		0293	0512	\$.00
	a. Commercial layers	0294 <input type="checkbox"/>		0295	0513	\$.00
	b. Other chicken hens	0296 <input type="checkbox"/>		0297	0596	\$.00
2.	Chickens less than 4 months old	0300 <input type="checkbox"/>		0301	0597	\$.00
3.	Roosters and pullets	0302 <input type="checkbox"/>		0303	0598	\$.00
4.	Ducks	0306 <input type="checkbox"/>		0307	0599	\$.00
5.	Pigeons	0308 <input type="checkbox"/>		0309	0618	\$.00
6.	Other (geese, turkeys, etc.) - Specify ↴					
0620	<input type="text"/>	0264 <input type="checkbox"/>		0265	0619	\$.00
0621	<input type="text"/>	0622 <input type="checkbox"/>		0623	0624	\$.00
7.	Quantity and value of chicken eggs sold in 2023	0273 <input type="checkbox"/>		None	Dozens sold	Value of sales
						\$.00

SECTION 9 AQUACULTURE

Did you or anyone else raise any FISH or AQUACULTURE PRODUCTS (shrimp, etc.) for sale?

0280 1 Yes - Complete this section 3 No - Go to Section 10

		Number	
1.	How many in-ground ponds did you use?	0281	
2.	How many above-ground tanks did you use?	0282	
		Pounds sold	Value of sales
3.	How much FISH or other AQUACULTURE products were raised and sold from this place in 2023?	0504	0505 \$.00

SECTION 10 PRODUCTION EXPENSES

How much were your EXPENDITURES for each of the following in 2023?

		None	Dollars only	
1.	Machine hire and customwork	0341	<input type="checkbox"/>	\$.00
2.	Wages and salaries paid to employees or hired farm workers (DO NOT include housework or contract construction work.) Include cash payments only ..	0342	<input type="checkbox"/>	\$.00
3.	Repairs, supplies, and maintenance costs for the farm business	0821	<input type="checkbox"/>	\$.00
4.	Gasoline, fuels, and oils purchased for the farm business. Include diesel, natural gas, LP gas, motor oil, grease, etc.	0348	<input type="checkbox"/>	\$.00
5.	Water expenses - Include water used for irrigation	0349	<input type="checkbox"/>	\$.00
6.	Transportation costs (excluding fuel expenses)	0340	<input type="checkbox"/>	\$.00
7.	Livestock, poultry, and fish purchased	0346	<input type="checkbox"/>	\$.00
8.	Feed purchased for livestock, poultry, and fish - Include cost of grain, feed, concentrates, and roughages; also amount paid for grinding and mixing feed	0343	<input type="checkbox"/>	\$.00
9.	Insecticides, fungicides, and herbicides	0344	<input type="checkbox"/>	\$.00
10.	Fertilizers and manure purchased	0345	<input type="checkbox"/>	\$.00
11.	Seed costs - include seedlings purchased	0347	<input type="checkbox"/>	\$.00

SECTION 11 EQUIPMENT

Which of the following EQUIPMENT are used on this place? Include all specified equipment on this place today, regardless of ownership, provided it is in operating condition.

		None	Number
1.	Tractors of all kinds	0320	<input type="checkbox"/>
2.	Motortrucks	0321	<input type="checkbox"/>
3.	Automobiles	0322	<input type="checkbox"/>
4.	Tillers of all kinds	0323	<input type="checkbox"/>

SECTION 12 PRACTICES

1. At any time during 2023, did this operation –
- a. Have fallow land? 0354 1 Yes 3 No
 - b. Rotate crops? 0355 1 Yes 3 No
 - c. Build paddocks for pasture rotation? 0356 1 Yes 3 No
 - d. Plant any grasses such as guinea grass, napier or other species for land improvement? 0357 1 Yes 3 No
 - e. Use a computer for the farm business? (laptop, desktop, tablet) 0359 1 Yes 3 No
 - f. Have internet access, either on the operation or at a producer's residence?

0376 1 **Yes** - Report the type of service that was used to access the internet. Mark all that apply:

- 1265 Cellular data plan for a smartphone or other mobile device
- 1266 Satellite Internet service installed
- 1775 Don't know
- 1271 Broadband (high speed) Internet service such as cable, fiber optic, or DSL service installed
- 1261 Dial-up Internet service installed
- 1268 Other, specify below ↴

3 **No**

1269

- g. Use conservation practices/asures (such as residue management, mulching, green manure crops, etc.) to conserve natural resources on site and to improve soil health on site? 0824 1 Yes 3 No
- h. Use conservation practices such as installing a high tunnel system to extend fruiting/flowering season or to protect crops from environmental impacts such as heavy rain or full sun exposure? 0825 1 Yes 3 No

2. During 2023, did this operation produce and sell any processed or value-added products from its own production? 1726 1 Yes → 2727 3 No

Value of Sales (Dollars)	
\$ <input style="width: 80%;" type="text"/>	.00

3. How many unpaid and paid farm workers (including the producer and family members) worked on this place in 2023? 0051

Number of workers
<input style="width: 100%;" type="text"/>

- a. Of the unpaid farm workers (including the producer and unpaid family workers), how many worked.
- b. Of the paid farm workers (hired workers and paid members of the producer's family), how many worked.

150 days or more?	25 to 149 days?	Less than 25 days?
0052	0053	0054
<input style="width: 100%;" type="text"/>	<input style="width: 100%;" type="text"/>	<input style="width: 100%;" type="text"/>
0055	0056	0057
<input style="width: 100%;" type="text"/>	<input style="width: 100%;" type="text"/>	<input style="width: 100%;" type="text"/>

4. What type of operating organization does this place have? 0058

- 1 Individual
- 2 Partnership
- 3 Corporation (DO NOT include cooperatives)
- 4 Other (Cooperative, estate, trust, etc.)

5. At any time during 2023, did this operation use precision agriculture practices to manage crops or livestock? This would include the use of global positioning (GPS) guidance systems, GPS yield monitoring and soil mapping, variable rate input applications, use of drones for scouting fields or monitoring livestock, electronic tagging, precision feeding, robotic milking, etc. 1165 1 Yes 3 No

SECTION 13 PRODUCER CHARACTERISTICS

The following questions are about the CHARACTERISTICS of the FARM PRODUCER.

1. How old were you (producer) on December 31, 2023? 0362

Age

2. SEX of producer

0367 1 Male 2 Female

3. Is the producer of Hispanic, Latino, or Spanish origin?

2001 1 Yes 3 No

4. Race of producer (Select all that apply)

2003 White

2004 Black or African American

2005 American Indian or Alaska Native, specify tribe: 2006

2007 Asian Indian

2008 Chinese

2009 Filipino

2010 Japanese

2011 Korean

2012 Vietnamese

2013 Other Asian, specify: 2014

2015 Native Hawaiian

2021 Carolinian

2016 Chamorro

2017 Samoan

2018 Other Pacific Islander, specify: 2019

5. Do you (producer) live on this place (the acres entered in section 1, question 4)?

0360 1 Yes 3 No

Year

6. In what YEAR did you (PRODUCER) begin to operate any part of this place? 0361

7. At which occupation did you (producer) spend the majority (50 percent or more) of your work time in 2023? ... 0363

- 1 Farming or ranching
2 Other

8. OFF-FARM WORK – How many days did you (producer) work at least 4 hours per day off this place in 2023? Include work at a nonfarm job, business, or on someone else's farm. (Exclude exchange farm work.) 0364

- 1 None 4 100 - 149 days
2 1 - 49 days 5 150 - 199 days
3 50 - 99 days 6 200 days or more

9. In 2023, how many men and women were involved in decisions for this operation (include family members and hired managers)? Exclude hired workers unless they were a hired manager or family member 1571

Men

Women

SECTION 14 **ENUMERATOR'S RECORD** (To be completed by the census enumerator)

1. Who furnished the information in this report? 0370

}	1 <input type="checkbox"/> Producer	4 <input type="checkbox"/> Hired laborer
	2 <input type="checkbox"/> Landlord	5 <input type="checkbox"/> Other <i>Specify</i> ↘
	3 <input type="checkbox"/> Spouse or other family member	0371 <input style="width: 100px; height: 20px;" type="text"/>

2. **REMARKS** – Make any remarks needed in regard to the place, the owner or producer, the crops cultivated, or the livestock on this place.

3. RESIDENCE OF PRODUCER	a. ED 0997	b. Village 0981	
4. LOCATION OF LAND	a. ED 0982	b. ED number 0930	
5. CERTIFIED BY	Enumerator's signature 0984	Enumerator code 9997	Date 0985
			/ /2024
6. CHECKED BY	Supervisor's signature 0986	Supervisor's code 9969	Date 0987
			/ /2024
7. RESPONSE	9901 1 <input type="checkbox"/> Complete 2 <input type="checkbox"/> Refusal 3 <input type="checkbox"/> Inaccessible 4 <input type="checkbox"/> Office Hold		
	5 <input type="checkbox"/> Refusal - Est 6 <input type="checkbox"/> Inaccessible - Est 7 <input type="checkbox"/> Office Hold - Est 8 <input type="checkbox"/> Known Zero		
8. TYPE OF DATA COLLECTION	9903 1 <input type="checkbox"/> In person 2 <input type="checkbox"/> By phone 3 <input type="checkbox"/> Other		

This page intentionally left blank.

SECTION 15 CONCLUSION

1. Is it possible that the agricultural activity information reported for this operation could also be reported by another operation?

1080 1 **Yes** - Provide the other name and address below 3 **No** - Go to Item 2

Possible Duplicate Name		Address		
1081	<input type="text"/>	1082	<input type="text"/>	
City		State	Zip	
1083	<input type="text"/>	1084	<input type="text"/>	1085 <input type="text"/>

2. Do you (the individual named on the label) make any day-to-day decisions for another farm or ranch? It is important that the Census of Agriculture accurately accounts for all of your farm or ranch operations.

1086 1 **Yes** - Enter the information of the additional farm or ranch below 3 **No**

Additional Farm or Ranch		Area Code and Phone Number		Check if cell phone
1088	<input type="text"/>	1089	<input type="text"/> - <input type="text"/> - <input type="text"/>	<input type="checkbox"/>

a. Were you contacted to complete a 2023 Census of Agriculture report form for this additional farm or ranch?

1087 1 **Yes** 3 **No**

b. Did you include all data from this additional farm or ranch on THIS REPORT? Do not make changes to the data in this report, regardless of your answer.

1091 1 **Yes** 3 **No**
